[REDACTED]

This report supplements NPIC/R-148/63 and R-767/64, 1/ 2/ which discuss the Brody MRBM Complex (Figure 1), previously consisting of 2 Type I and 1 Type IV MRBM launch areas, 1 fixed field site, and an associated rail-to-road transfer point.

Brody Fixed Field MRBM Site No 2 is located in a wooded area 3.6 nautical miles (nm) south-southeast of Stanislavchik and 8.3 nm west-northwest of Brody in the Ukrainian SSR. The site was not present on photography

[REDACTED] and was first observed while under construction on [REDACTED]

Launch Areas No 1 and 2 were first observed as completed sites in [REDACTED]

Launch Area No 3 was complete in [REDACTED]

[REDACTED]. Launch Areas No 1 and 2 are located 8.3 nm and 14.4 nm, respectively, northeast of the field site, and Launch Area No 3 is 10.0 nm to the east. Fixed Field Site

No 1 is 3.7 nm to the east-southeast.

Fixed Field Site No 2 (Figure 2) is situated in a forest-bordered clearing and contains 4 launch positions in an offset inline pattern. The eastern launch positions are 270 feet apart, and the western launch positions are separated by 250 feet. The approximate orientation of the site is 220 degrees.

When initially observed in [REDACTED] the field site consisted of a main access road with no launch positions yet present. [REDACTED] coverage [REDACTED] showed the site to be in a probably complete condition. Small clearings in the forest area to the east were now present, and a large clearing containing multiple small unidentified objects was located in the southwestern portion of the site. Subsequent missions, including excellent-quality coverage in [REDACTED] disclosed no apparent change in the site.
